

Should I WORK Today?

You should **NOT** be at work if you have any of the following symptoms:

COUGH

- If you have a COUGH and FEVER (higher than 100° F or 38° C within the last 24 hours without the use of fever reducing medicines).
- If you have a cough and NO fever, wear a mask at work until cough has resolved.

FEVER

- If you have a fever (higher than 100° F or 38° C within the last 24 hours without the use of fever reducing medicines).

VOMITING & DIARRHEA

- If you have new (less than 2 weeks) vomiting or diarrhea.
- You CANNOT work until you have no diarrhea for 48 hours, and/or no vomiting for 48 hours.

EYE CONDITIONS

- You CANNOT work with eye drainage until eye drainage has resolved.

If you are not sure or have further health concern questions please contact Occupational Medicine at 577-4166 for further guidance.
